

A collection of various tools including wrenches, pliers, a hammer, and sockets scattered on a grey workbench. The tools are in various orientations, some in sharp focus and others blurred in the background.

# AIRLOCK AFTER MARKET SERVICES

**Airlock India Pvt. Ltd.** is young and energetic company with passion to deliver value to the customers . We undertake servicing of Rotary valves, Diverter valves, Blowers & Pneumatic conveying components. We do not have limitations in servicing other make of valves. Airlock has professionally trained engineers / technicians to service all makes. Our company has a separate service facility and a team to perform all service work.

Our factory trained engineers will discuss with you and your management and finalize the most appropriate program the plant needs. These range from services that are cost effective, proactive and compliance oriented. For example, we have Drop-in replacement concept which is very new to this part of the world. Please feel free to contact us for further discussion on the above concept.

### **CUSTOM SOLUTIONS FOR EVERY PROBLEM**

If your airlock is prematurely wearing, caking, sticking or leaking, we can advise on how to minimize or eradicate these issues. There are variety of conditions that can cause an airlock to work inefficiently or cease. Every situation is unique and requires a custom Rotary Airlock solution. Our extensive knowledge of Airlock and pneumatic conveying expertise allows to find a solution for every problem.

### **WHY AIRLOCK**

- Years of experience in Rotary / Diverters valves and their application expertise. Please call us, when you have a new application or moving a rotary valve from one application to another.
- We have enough experience to advise the right valve to handle different product.
- Factory trained technicians available for on-site valve services.
- On-site training programs to train your factory technicians and operators to assemble and disassemble the valve as per manual.

We provide After Sales Service and complete Spares back-up for all products we manufacture / handle.

We undertake maintenance of Rotary Valves, Diverter Valves, Blowers of all sizes and makes including Annual Maintenance Contract for the same.

Our engineers are factory trained in servicing various brands of Blowers, Rotary Valves, Diverter Valves, Butterfly Valves and other equipment's mostly used in process industries.

We provide similar services in the countries we have our associate companies. The support is extended to Thailand, Indonesia, Singapore, Malaysia, Australia and New Zealand.

We stock commonly used Spares for Valves, Blowers etc.

We do stock Spares for chosen System Integrators and End Users on request.
