

GRAVITY DIVERTER VALVE

GDV

GRAVITY DIVERTER VALVE:

Airlock Gravity Diverter Valves (GDV) are designed for reliable diversion of gravity-fed Powders, Pellets, Granules and other Bulk Solid Materials.

The robust design provides quick and easy disassembly, making the GDV particularly suitable for applications requiring frequent cleaning, inspection and product changeover.

GDV valves are widely used in Food, Dairy, Pharmaceutical, Chemical and other Bulk Solid Handling Industries.

The GDV is supplied as a complete, factory-assembled unit with a Pneumatic Actuator and associated components.

FEATURES:

- Simple compact construction
- Single piece Rotor construction
- Material available is Stainless-Steel, Cast-Iron and Aluminum
- Easy to maintain
- Minimised product retention and dead zones

DESIGN:

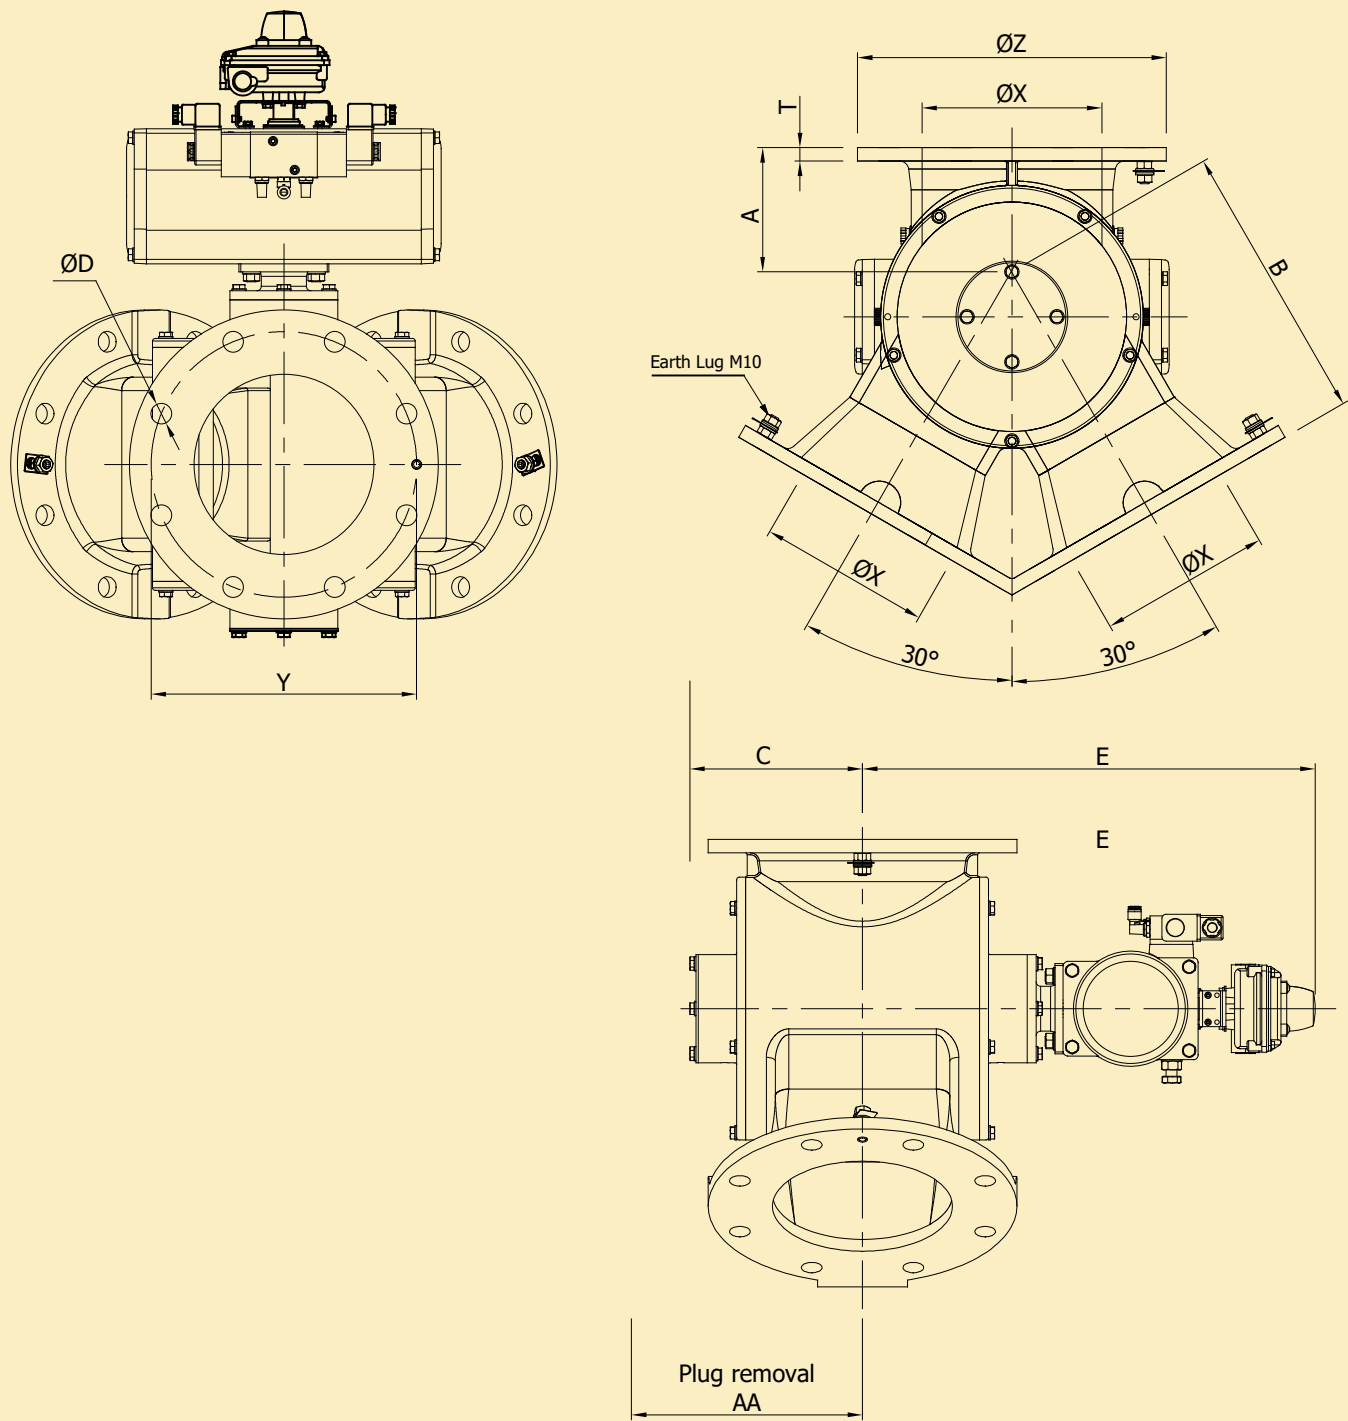

- Sizes from 150 to 300 mm
- DIN/ ANSI / JIS Drilling Pattern
- Operating temperature -10 to +80 deg C

OPTION:

- Sanitary Finish

GRAVITY DIVERTER VALVE
